BIOMETRIKA

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

MANAGING EDITOR

E. S. PEARSON

ASSOCIATE EDITORS

M. G. KENDALL JOHN WISHART

in consultation with

HARALD CRAMÉR R. C. GEARY

J. B. S. HALDANE

VOLUME 37

1950

ISSUED BY

THE BIOMETRIKA OFFICE, UNIVERSITY COLLEGE, LONDON

PRINTED AT THE UNIVERSITY PRESS, CAMBRIDGE

UNIVERSITY OF UTAH LIBRARIES

PRINTED IN GREAT BRITAIN

CONTENTS OF VOLUME 37

Memoirs

		PAGES
I.	Periodogram analysis and continuous spectra. By M. S. Bartlett. With five Figures in the Text	1—16
II.	Notes on continuous stochastic phenomena. By P. A. P. Moran	17—23
III.	Accident proneness. By Major Greenwood	24—29
IV.	Organic correlation and allometry. By K. A. Kermack and J. B. S. Haldane	30—41
V.	The probability integral transformation when the variable is discontinuous. By F. N. David and N. L. Johnson. With one Figure in the Text	42—49
VI.	How balanced incomplete block designs may be made to furnish orthogonal estimates in weighing designs. By K. S. Banerjee	50—58
VII.	The power of the χ^2 index of dispersion test when Neyman's contagious distribution is the alternate hypothesis. By G. I. Bateman. With one Figure in the Text	59—63
VIII.	Power of the modified t-test (u-test) based on range. By E. Lord	64—77
IX.	The use of mean range as an estimator of variance in statistical tests. By P. B. Patnaik	78—87
X.	Some notes on the use of range. By E. S. Pearson	88—92
XI.	On the statistical independence of quadratic forms in normal variates. By A. C. Aitken	93—96
XII.	Two combinatorial tests of whether a sample has come from a given population. By F. N. David. With one Figure in the Text	97—110
XIII.	Maximum likelihood and the efficiency of the method of moments. By L. R. Shenton	111—116
XIV.	Fiducial limits of the parameter of a discontinuous distribution. By W. L. Stevens. With two Figures in the Text	117—129
XV.	Extension of the Neyman-Pearson theory of tests to discontinuous variates. By K. D. Tocher	130—144
XVI.	A simplified form of Sheppard's correction formulae. By H. O. Hartley	145—148
XVII.	Some theorems in least squares. By R. L. Plackett	149—157
XVIII.	Weighted probits and their use. By A. N. Black	158—167
XIX.	Table of the probability integral of the t-distribution. By H. O. Hartley and E. S. Pearson	168—172
XX.	A simple stochastic epidemic. By Norman T. J. Bailey. With two Figures in the Text	193—202

UNIVERSITY OF UTAH LIBRARIES

		PAGES
XXI.	On the Fisher-Behrens test. By G. A. Barnard	203—207
XXII.	The incomplete beta function as a contour integral and a quickly converging series for its inverse. By M. E. Wise	208—218
XXIII.	On the levels of significance of the incomplete beta function and the F-distributions. By Leo A. Aroian	219—223
XXIV.	On the generalized second limit-theorem in the calculus of probabilities. By K. S. Rao and David G. Kendall	224—230
XXV.	A note on the cumulants of Kendall's S-distribution. By H. Silverstone	231—235
XXVI.	The distribution of the variance ratio in random samples of any size drawn from non-normal universes. By A. K. Gayen. With four Figures in the Text	236—255
XXVII.	The comparison of percentages in matched samples. By W. G. Cochran	256—266
XXVIII.	The exact partition of χ^2 and its application to the problem of the pooling of small expectations. By H. O. Lancaster	267—270
XXIX.	The use of range in analysis of variance. By H. O. Hartley. With one Figure in the Text	271—280
XXX.	On the comparison of estimators. By N. L. Johnson. With four Figures in the Text	281—287
XXXI.	A rapid method for ascertaining serial lag correlation. By Gordon D. Gibson. With seven Figures in the Text	288—307
XXXII.	The maximum F-ratio as a short-cut test for heterogeneity of variance. By H. O. Hartley	308—312
XXXIII.	Tables of the χ^2-integral and of the cumulative Poisson distribution. By H. O. Hartley and E. S. Pearson	313—325
XXXIV.	On a sequential t-test. By S. Rushton	326—333
XXXV.	Properties of some tests in sequential analysis. By A. G. Baker. With three Figures in the Text	334—346
XXXVI.	The unbiased estimation of heterogeneous error variances. By A. S. C. Ehrenberg	347—357
XXXVII.	Sampling theory of the negative binomial and logarithmic series distributions. By F. J. Anscombe. With one Figure in the Text	358—382
XXXVIII.	On questions raised by the combination of tests based on discontinuous distributions. By E. S. Pearson. With two Figures in the Text	383—398
XXXIX.	Significance of difference between the means of two non-normal samples. By A. K. Gayen	399—408
XL.	Testing for serial correlation in least squares regression. I. By J. Durbin and G. S. Watson	409—428
XLI.	Distribution of 'Student'-Fisher's t in samples from compound normal functions. By Hannes Hyrenius	429—442

UNIVERSITY OF UTAH LIBRARIES

Miscellanea

		PAGES
(i)	A method of estimating the parameters of an autoregressive time-series. By S. G. GHURYE. With two Figures in the Text	173—178
(ii)	A test for the serial independence of residuals. By P. A. P. MORAN	178—181
(iii)	Efficiencies of certain linear systematic statistics for estimating dispersion from normal samples. By K. R. NAIR	182—183
(iv)	Apparent correlation between independent series of autocorrelated observations. By GILBERT WALKER	184—185
(v)	On the inversion of circulant matrices. By I. J. GOOD	185—186
(vi)	The effect of non-normality on the z-test, when used to compare the variances in two populations. By D. J. FINCH	186—189
(vii)	Review of M. G. Kendall's *Rank Correlation Methods*. By F. N. DAVID	190
(viii)	Review of *Proceedings of the Berkeley Symposium on Mathematical Statistics and Probability*. Edited by J. NEYMAN. By F. N. DAVID	190—191
(ix)	The comparison of pairs of treatments in split-plot experiments. By J. TAYLOR	443—444
(x)	On the best unbiased quadratic estimate of the variance. By H. NAGLER	444—445
(xi)	The cumulants of the first n natural numbers. By A. STUART	446
(xii)	Note on the χ^2 smooth test. By D. A. S. FRASER	447—448
(xiii)	An alternative form of χ^2. By F. N. DAVID	448—451
(xiv)	On a theorem concerning the secondary subscripts of deviations in multivariate correlation using Yule's notation. By K. N. CHANDLER	451—452
(xv)	Review of N. L. Johnson and H. Tetley's *Statistics*, Vol. I. By R. E. BEARD	453—454
